Caring for Your Cloud

Congratulations on the purchase of your new cloud! Instructions for a happy and healthy cloud:

1. Name your cloud. 2. Water your cloud daily using only

fresh clean water. Failure to do so may result in your cloud evaporating into thin air.

 However, avoid overwatering, as this may result in downpours.
 Rainfall can be unpredictable. Always

place a bucket under your cloud as a precaution, especially when your cloud is young.

B. Clouds are sensitive, and sometimes moody. Thunderstorms are possible if a cloud is unhappy.
6. Never confine a cloud to a small space.
