

Getting to Know You!

1 Sniffing

Kittens are curious! They can use their sense of smell and touch to get to know you. Keep your palm up so your kitten can easily sniff your hand. Let your kitten explore his or her new home slowly and at his or her own pace.

2 Purring and More

ROAR! Did you know kittens are part of the same family as lions, tigers, and other big cats? They may not roar like a lion, but they can let us know how they are feeling.

A soft purr can mean your kitten is happy!

A meow may mean your kitten needs some attention.

A hiss or a rounded back may mean your kitten is frightened or unhappy. Use a calm voice and let your kitten relax before you approach him or her.
