

More Cool Robotics Careers!

An **animatronic technician** (say: an-nuh-muh-TRAH-nick teck-NIH-shun) builds puppet-like robots used for entertainment. The robots might appear in theme parks or on movie sets.

A **machinist** makes metal parts for robots and other machines. They use a lot of tools like drills, saws, and grinders.

A **robotics research scientist** studies and experiments with new kinds of robotics technology. They develop new ideas about robots and their uses.

A **robotics technician** makes sure robots are running smoothly in places like factories. They follow instruction manuals to set up and repair robots.

A **rover driver** sends instructions to a rover, which is a robotic vehicle in space. They tell the rover what to look at and where to go.
